## **Management of Public Trees – Brentwood Avenue.**

### **Some background (as a Resident) –**

We moved here nearly seven years ago. One of the reasons we chose Brentwood Avenue was “the trees”. They have provided shade, bird life, and certainly add to the value of our homes here in Kamo.

**Trees reduce the 'Greenhouse' effect by removing carbon dioxide from the air and releasing oxygen.** Each year a mature tree produces enough oxygen for 10 people. Trees are also an effective sound barrier and can limit noise pollution. Recent research shows that trees also help reduce the stress of modern life.

1. You will be aware that most of the homes in Brentwood Avenue are owned and cared for by retired people. We were only here for a couple of days before a neighbour (Lynda Lynch) arrived at our doorstep demanding that we sign a petition to have the Magnolia grandiflora cut down.

We were shocked!

2. This is a copy of correspondence sent to Sue Hodge in 2022.

Hello Sue,

I have been forwarded the letter from Council regarding the removal of the Magnolia Grandiflora trees in Brentwood Avenue.

**WE DO NOT AGREE** that the residents should have to pay for their removal. The Council is the “FIRST” to point out that the Trees and the Berm that they are planted on is their land and that we need to get permission from the council to alter any of that before proceeding.

This is a “cop-out” by the Council.

Sheryl Mai says that any remedial work has not been budgeted for – It should have been!

There are many streets in and around Whangarei that have footpaths and driveways that are affected by tree roots –

I assume everyone is going to have to pay for the Council’s inability to plan for the future.

This is simply **BAD PLANNING** on the Council’s part.

Regards

Alison and Tony Shrigley

12 Brentwood Avenue.

**Moving Forward – Application for Resource Consent –  
(I REFER TO THE Resource Consent papers)**

1. 4.3 (2) And supports local residents funding the removal of the trees, stump grinding the remains and replanting with a suitable tree species that is agreeable to both parties.

At no point did we (the Shrigleys) AGREE to pay for any of this work to be done.

Plus, the WDC is the first to remind the residents that the Berm and the trees are Council property.

Notable and Public Trees	
TREE-R6	Discretionary Activities (Land Use)
Public Trees	Removal of any public tree comply with the permitted activity rules within TREE-R6.
TREE-REQ2 provides Assessment Criteria for Discretionary activities.	Comment / Infringement
	30 of the 34 trees proposed to be removed are considered public trees.
	The removal does not comply with the permitted activity rules within TREE-R6 as the removal is not in relation to overhead or underground utilities.
	Discretionary activity

The WDC cannot have what appears to be “double standards” – either the WDC owns and maintains the Berm and the trees – OR –

I would point out that if the residents do purchase new trees and plant them – then they become the Resident’s property.

This action will also set a standard for other streets within Whangarei.

**2. Tree Replacement –**

The 34 trees proposed for removal will be replaced at a ratio of 3:1 with species selected from the “Palette of Replacement Trees” available in Attachment 9. For each of the 34 trees to be removed there is proposed to be a one to one within the road reserve of Brentwood Avenue, and an additional two trees planted in the nearby reserve located off Brentwood Avenue (Lot 17 DP137989).

At no point did we (the Shrigleys) agree to provide extra trees for a public park.

This is the Council’s responsibility.

Dear Holly

**s92 Response: LU2300005 - Brentwood Ave Street Tree Removal**

The following seeks to clarify the proposal and provide further information in response to the request for information pursuant s92 of the RMA 1991.

**1. Further information and assessment of proposed replacement tree species**

Refer to our in-house Arborists' comments on the replacement tree species (Attachment 1).

*"My recommendation would be Ginkgo biloba 'Fastigiata' or Magnolia Aurora. Both trees are deciduous and slow growing, that are suited for small berms."*

Further to this comment, an ecological report prepared by Wild Ecology, dated 14/03/2023, is provided with the following comments relevant to tree replacement species (Attachment 3)

*"Should native species be the preference of the local residents, Wild Ecology would recommend limiting the native species selection within the road berms to titoki (Alectryon excelsus) or pohutukawa (Metrosideros excelsa) 'Maori princess.'" pg.7*

A tree pallet is also provided as Attachment 2. This list is derived from our Global Street Tree Replacement consent LU2200116 granted December 2022. The proposal suggests the residents would like input into the replacement tree species.

As such, it is suggested a condition may be appropriate that allows the residents (facilitated through Council) to make the tree replacement selection from the tree pallet, with final approval required by the Parks Manager before planting.

**2. Outline what will occur after the tree and rootball removal, particularly those extending into the surrounding environment**

Refer to our in-house Arborists' comments as provided in Attachment 1;

A. Ginko Bilba –

Ginkgos are large trees, normally reaching a height of 20–35 m (66–115 ft),<sup>[16]</sup> with some specimens in China being over 50 m (165 ft). The tree has an angular crown and long, somewhat erratic branches, and is usually deep-rooted and resistant to wind and snow damage. Young trees are often tall and slender, and sparsely branched; the crown becomes broader as the tree ages. A combination of resistance to disease, insect-resistant wood, and the ability to form aerial roots and sprouts makes ginkgos durable, with some specimens claimed to be more than 2,500 years old.<sup>[17]</sup>

Ginkgo biloba is **not an invasive species**. And the tree roots go down rather than spreading, so their roots are also not considered invasive.

B. Magnolia Aurora –

Magnolia 'Aurora' was raised by Os Blumhardt of Whangarei and is probably his best hybrid. It is a cross between 'Starwars' and M. sargentiana var robusta. It forms a columnar tree with an upright habit and settles down to flower in the second or third year from planting. One thing we have noticed at Magnolia Grove is that 'Aurora' will flower like clockwork every year while other varieties seem affected by the weather and flower later and earlier some years.

Magnolias typically grow to between 60 and 80 feet in height, and their root systems can spread up to 40 feet outward. While the magnolia root system is extensive, it doesn't go very

deep into the ground. The roots grow horizontally rather than vertically, and they stay relatively close to the soil's surface.

### **To summarise –**

1. We recognise that the footpaths in Brentwood Avenue have not been maintained and need replacing – rather than just “patched” up;
2. We do not believe it is the resident’s responsibility to pay for this work, or the cost of replacing the Magnolia trees;
3. We do not believe that the resident’s should be paying for EXTRA trees to be planted into a Public Park;
4. We do believe that the Council’s view on the residents paying for this work will set a standard for other streets in Whangarei in the future. We are of the view that this will not sit well with other residents of our city. Afterall is that not WHY we pay Rates???
5. The Street Berm and the trees are the Council’s property and budgeting for the upkeep should remain the Council’s responsibility.

**Submission on resource consent**

We live in the street next to Brentwood Ave and we are 87 and 85 years of age. We have had serious health issues and have been advised to walk daily, by our health carers. Brentwood Ave (which is our limited capability) is extremely dangerous to walk because of the roots of these trees uplifting the footpath. We have often

A copy of your submission must be served on the applicant as soon as reasonably practicable after service of your submission on Whangarei District Council

stumbled and tripped on these roots. Also the rest home adjoining Brentwood Ave is where the elderly people who walk (with walkers) for their exercise. Brentwood footpath is dangerous for them.

I am/we are making a submission on the application for resource consent described below

Name of applicant WDC Parks & Recreation Council ref LU2300005  
Proposal Removal of Brentwood Ave Trees.

**In general I/we (please ✓ appropriate box)**

Support the application  Oppose the application  Neutral

The particular parts of the application I/we support/oppose or wish amendments to be made to are (please ✓ appropriate box)

Whole application, or (Attach any additional sheets used)

As Brentwood Avenue, in Kamo, is in a flight path of the Kereru native pigeon I support the planting of native berry bearing trees as replacements. As an amendment to the tree list perhaps a "TOUGHIE" such as Pseudopanax crassifolius or Pseudopanax crassifolius trifoliatum might be added, as suitable, for the varying local site conditions.

A copy of your submission must be served on the applicant as soon as reasonably practicable after service of your submission on Whangarei District Council.

The reasons for making my/our submission are *(Attach any additional sheets used)*

Public Safety is at serious risk from damage to footpaths, driveways private pathways and access to homes. Trip and fall injuries range from bruising to broken arms, so far. We plead for URGENT Removal of trees.

I/we wish Whangarei District Council to make the following decision

*(please ✓ appropriate box and if appropriate give details of the nature of any conditions sought)*

Approve the application

Decline the application
